

Stand Alone Bar Code Verification System

- * **Provides ISO (ANSI) Print Quality Verification of Bar Codes and Matrix Codes such as PDF-417, Micro PDF, Data Matrix, RSS Composite Code, Stacked Codes, Linear Codes**
 - * **Extremely easy operation; verifies in seconds, not even a button to push**
- * **Bar Codes verified every .002" (0.05mm) of the height of the bars, performing more than the 10 reads required per ISO**
- * **Quick and easy reading of the results. Printed in large letters, numbers, and color coded**
- * **Can verify multiple codes and different symbologies, at one time**
 - * **Detects blemishes in the bar code; an ability that surpasses the Defects (Spots and Voids) of ISO (ANSI) grading**
 - * **Validation of the human readable data to the bar code**
 - * **Easy user setup and calibration (Meets ISO 9000 and 21 CFR Part 11 Audit Criteria)**
 - * **Auto discriminates symbology and aperture size**
 - * **High level analysis of bar code defects**
 - * **"Easy Spot" Feature to locate the problem area in a bar code**
- * **Is GS1 US Certified to GS1 System Standards**
 - * **MIL STD 130M Compliant**
